icon index

Moisture management is achieved at the YARN stage, where the microfine yarns create a capillary action to channel sweat away.

The skillful blending of natural and man-made yarns results in fabrics that have easy properties.

Stay warm and feel comfortable with a breathable insulated membrane, and resistance barrier to extreme elements.

Unique finish that controls bacteria growth, prevents odours and maintains garment freshness.

Fabric is engineered to prevent snagging.

A treatment applied to fabric that resists the formation of little balls or pills on the surface of the garment.

Products allow moisture to escape from the body.

Unique yarns or fabric finishes that transport moisture to the outer surface.

Products made of waterproof materials and fully seam sealed to keep moisture out.

Permanently covering the inner seams with waterproof tape for long lasting waterproof protection.

The fabric sits closer to the body in the torso & sleeves for an athletic look.

Fabric surface is treated to repel water.

Protect yourself from wind and rain. This technology offers complete comfort in a variety of conditions.

Fabric finishes are used to resist moisture penetration.

Fabric content provides stretch allowing for a more comfortable fit.

Product helps prevent wind from penetrating.

Microscopic water droplets are transported into the atmosphere and are dispersed into the air.

Inside opening for easy decorating access.

Three materials of differing characteristics are joined together, creating a composite fabric with superior performance.

Product provides protection from UV rays. UPF value represents the fractional amount of the sun's harmful UV rays that pass through fabric.

sizing chart

We encourage the use of sizing samples to have a more accurate sizing for our styles. To that end we offer samples at a reduced price. There is no extra charge on the larger sizes for in-stock items.
